

- Unique SiFi II (Signal Fidelity II) technology: generate the arbitrary waveforms point by point; recover the signal without distortion; sample rate accurate and adjustable; jitter of all the output waveforms (including Sine, Pulse, etc.) as low as 200 ps
- 2 Mpts memory depth (standard); 8 Mpts memory depth (optional) per channel for arbitrary waveforms
- Optional dual-channel with the same performance, equivalent to two independent signal sources
- High frequency stability: ±1 ppm; low phase noise: -105 dBc/Hz
- Built-in high-order harmonic generator (at most 8-order harmonics)
- Built-in 7 digits/s, 240 MHz bandwidth full featured frequency counter
- Up to 160 built-in arbitrary waveforms, covering the common signals in engineering application, medical electronics, auto electronics, math processing, and other various fields
- Sample rate up to 125 MSa/s, vertical resolution 16 bits
- Arbitrary waveform sequence editing function available; arbitrary waveforms also can be generated through the PC software
- Various analog and digital modulation functions: AM, FM, PM, ASK, FSK, PSK, and PWM.
- Standard waveform combine function, capable of outputting specified waveforms combined with the basic waveforms
- Standard channel tracking function, when enabled, all the parameters of both channels are updated based on users' configurations
- USB Host&Device interface (standard); USB-GPIB function supported
- 4.3" TFT color touch screen
- RS232, PRBS, and Dual-tone outputs supported

Design Features

Unique SiFi II Technology

Generate the arbitrary waveforms points by points without distorting the signals. In comparison with the last generation of the SiFi technology, SiFi II has added multiple filters, supporting the dynamic adjustment of the edge time.

Touch-enabled UI Design

Provide brand new UI operation experience, supporting the tap and drag operation gestures. You can also use the onscreen keypad to complete the parameter settings.

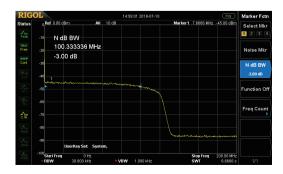

Advanced Function Output

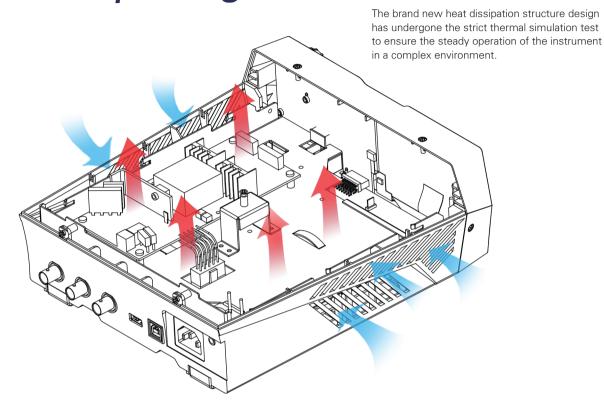

Support PRBS and RS232 pattern output and local Sequence editing.

100MHz Bandwidth White Gaussian Noise

Fan-free Mute Design 0 dB Operating Noise

DG800 Series Function/Arbitrary Waveform Generator

Dimensions: W×H×D = 237.4 mm × 97 mm × 268 mm Weight: 1.75 kg (Package Excluded)

▶ Function Interface

Dual-channel with the same performance (Required to install the DG800-DCH option for the single-channel model)

Arbitrary waveform function with the unique SiFi II technology

160 built-in arbitrary waveforms

Burst function

Various analog and digital modulation functions

Sweep function

Standard harmonic generator function

Dual-tone function

PRBS function

RS232 function

Sequence function

Waveform combine function

Standard 7 digits/s, 240 MHz bandwidth frequency counter

Channel and system setting

File management function

Specifications

Unless otherwise specified, all the specifications can be guaranteed when the following two conditions are met.

- The signal generator is within the calibration period.
- The signal generator has been running ceaselessly for over 30 minutes under the specified operating temperature (23 $^{\circ}$ C \pm 5 $^{\circ}$ C).

All the specifications are guaranteed except the parameters marked with "Typical".

DG800 series specifications

| Model | DG812 | DG811 | DG822 | DG821 | DG832 | DG831 |
|----------------|-----------|-------|--------|-------|--------|-------|
| Channel | 2 | 1 | 2 | 1 | 2 | 1 |

Overvoltage Protection

Occurred when:

The instrument amplitude setting is greater than 3.2 Vpp or the output AC+DC is greater than $|1.6V_{DC}|$ and the input voltage is greater than $\pm 12 \times (1 \pm 5\%)V$ (<10 kHz). Disruptive discharge voltage: $\pm 5(Vac + dc)$. The instrument amplitude setting is smaller than or equal to 3.2 Vpp or the output AC+DC is smaller than $|1.6V_{DC}|$ and the input voltage is greater than $\pm 2.6 \times (1 \pm 5\%)V$ (<10 kHz). Disruptive discharge voltage: $\pm 18(Vac + dc)$.
